Re: Use of TPO Roofs

To Whom It May Concern,

I have been a part of a private property management group that have managed a number of industrial buildings in the GTA for over 25 years. We started with ROOFCO in 2011 and they have installed over 250,000 SF of TPO roofing for us. Through those years the roofs have performed very well with normal year to year maintenance as required. They have proven to be a well managed and professional company from their owner Gary Kopp, to the office staff and the field workers.

Yours Sincerely,

A handwritten signature in black ink, appearing to read 'MS', with a large, sweeping flourish extending to the right and then looping back down to the left.
